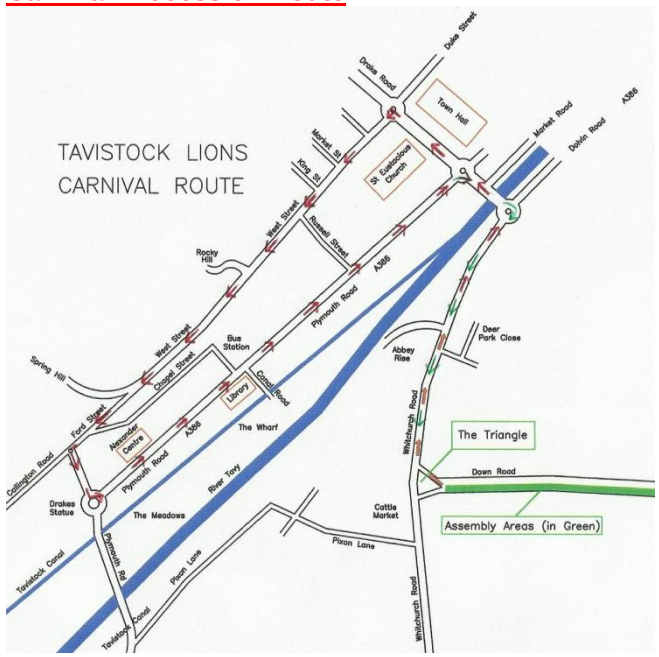
We work closely with the Police and other Emergency Services to ensure that the Carnival Procession is safe and enjoyable.
Useful tips with the Law in mind:-

Floats should not exceed 18.3 metres in length, 2.9 metres in width with not more than 305mm overhang on the sides and 3.6metres high. Brakes must be adequate. Towbars and towpins should be substantially constructed, properly fitted and any towpin should be adequate, be a good fit in the towbar eye and fitted with a safety clip. Use of a safety chain is recommended where possible.

Tyres must meet legal requirements in respect of tread depth, tyre pressures and specification. Lights must be adequate so that the foremost and rearmost units can be easily seen and provide warning to other road users.

Carnival Procession Route



Please see separate sheet for details of the different classes and the prize monies for each class.
